DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 6/1/07 is acknowledged and considered by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-11, 18, 28, 29, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Connor (5,450,860). O'Connor disclose a surgical fastener (12) adapted to assume a loop configuration, two flexible members/sutures (14, 20, the two narrow sections, one at each end of fastener 12), and two piercing members/needles (16,18), a coupling (fig. 1, recessed shank ends 22, 24).

Regarding the flexible members comprising metal, O'Connor disclose the fastener being made from PTFE with metal material (col. 12, lines 13-29).

Regarding the fastener comprising surgical clip, with a broadest reasonable interpretation, the fastener (12) is considered as a clip, which is adapted to grip or hook tissues.

4. Claim 33 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Adams (6,001,110).

Adams discloses a surgical fastener (10) adapted to assume a loop configuration, two needles (21, 22) coupled to the fastener ends (fig. 3, the entire clip coupled to the needles) and the surgical clip has a generally U-shaped when in said open configuration (fig. 3) and a closed configuration when in a relaxed state (figs. 1A and 5).

Regarding the fastener comprising surgical clip, with a broadest reasonable interpretation, the fastener (10) is considered as a clip, which is adapted to grip or hook tissues.

Allowable Subject Matter

5. Claims 24, 26 and 35 are allowed. The following is an examiner's statement of reasons for allowance:

Regarding claim 24, the prior art fails to disclose a tissue connector comprising in combination with other limitations of the claim, a coil and a first and second couplings as claimed.

Regarding claim 26, the prior art fails to disclose a tissue connector comprising in combination with other limitations of the claim, a knotted portion and a bore, as claimed

Regarding claim 35, the prior art fails to disclose a tissue connector comprising in combination with other limitations of the claim, a surgical clip assumes a spiral configuration when in a closed configuration.

6. Claims 12-17, 19-23, 25, 27, 30 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a

Art Unit: 3731

statement of reasons for the indication of allowable subject matter: the prior art fails to disclose a tissue connector comprising in combination with other limitations of the claim, a coupling and the enlarged portion or a coil (regarding claims 30) or a wire (regarding claim 31), as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
